

Ez Storage Privacy Policy

Effective Date: February 8, 2026

This Privacy Policy explains how we collect, use, and protect information when you use the Ez Storage mobile application (the "App").

1. Information We Collect

Account information. The App allows you to create an account using (a) email and password or (b) Google sign-in. When you sign in, we receive a unique account identifier ("User ID") from our authentication provider (Firebase Authentication). Your User ID is used to link your account to your stored app data.

App content you provide. The App stores the information you enter (for example: item names, categories, locations, notes, quantities, and other household inventory details) under your User ID.

Feedback and support messages. If you contact us using the App's built-in feedback/request feature, the App will include your account email address with your message so we can communicate with you and respond to your request. We use this email only for support and communication related to your request.

What we do not collect for other purposes. We do not use your email address for marketing, newsletters, advertising, or selling to third parties.

2. How We Use Information

We use the information described above to: (a) authenticate you and maintain your account, (b) store and sync your data across devices, (c) provide core app features such as creating, updating, importing/exporting, and sharing your household inventory data, (d) respond to support/feedback requests you submit, and (e) improve reliability and troubleshoot issues.

3. Services and Vendors (Firebase / Google)

The App uses Google Firebase services (such as Firebase Authentication and a Firebase database) to provide sign-in and data storage. These services may process limited information as part of providing the service (for example, authentication tokens, User ID, and the data you store in the App).

Google sign-in is used only to authenticate you. We do not access your Google password, and we do not request access to your Google Drive, Gmail, contacts, or other Google services unless explicitly stated in the App.

4. Sharing of Information

No sale of personal information. We do not sell your personal information.

Limited sharing. We share information only as needed to operate the App (for example, with Firebase as our service provider), or if required by law (such as responding to a valid legal request).

User-controlled sharing. If the App includes features that let you export or share your own data (for example, CSV export), you control where and with whom you share that exported content.

5. Data Storage and Retention

Your App data is stored in our Firebase database and associated with your User ID. We retain your data for as long as your account remains active, unless you delete it within the App or request deletion.

If you delete your account (or request account deletion), we will take reasonable steps to delete or anonymize your associated App data, subject to technical limitations and legal requirements.

6. Security

We use commercially reasonable safeguards designed to protect your information, including access controls and encryption in transit supported by our service providers. However, no method of transmission or storage is 100% secure, and we cannot guarantee absolute security.

7. Your Choices and Rights

You can access, update, export, or delete your App content from within the App (where available).

You may request deletion of your account and associated data by contacting us using the built-in feedback/request feature or the contact information below.

If you use Google sign-in, you can revoke the App's access from your Google account settings.

8. Children's Privacy

The App is not directed to children under 13, and we do not knowingly collect personal information from children under 13. If you believe a child has provided personal information, please contact us so we can take appropriate steps.

9. International Users

If you access the App from outside the United States, your information may be processed and stored in countries where our service providers operate. By using the App, you understand that your information may be transferred to and processed in those locations.

10. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. If we make material changes, we will update the effective date and, where appropriate, provide notice within the App or via another reasonable method.

11. Contact Us

You can contact us using the App's built-in feedback/request feature. When you submit a message through the App, your account email address will be included so we can reply and communicate with you about your request.
